# Specification.

## Naturemoss

Innerspace Cheshire **Naturemoss products** are suitable for internal use.

### Sustainability

All our preserved moss is sourced from sustainable sources where it can regrow each growing season. At the end of its useful life the moss can be composted.

Our MDF has very low VOC and zero formaldehyde emissions.

All our manufacturing is in our own workshop, run on renewable electricity.

### Installation

#### Walls

**forestfloor / lowland / meadow / rainforest / foothills / landscape / woods**

Panels can be screw fixed straight into the substrate wall.

Alternatively walls can be battened out. The panels are screwed into the battens.

Framed feature walls can be either hung on split battens or screwed straight into the substrate wall.

#### Panels

**modular**  
Glued or screwed.

#### General

### Maintenance

Preserved moss does not require any watering, or any light source. Generally, no maintenance is required.

#### Dusting

The moss can be lightly brushed over to remove any debris that has settled.

#### Protection

Care should be taken to avoid damaging the natural material. If the moss is damaged, the panels can be repaired. Contact us to organise this.

#### Humidity

Preserved moss can be damaged if humidity level is very high or very low. Restore comfortable humidity levels as soon as possible to avoid long term damage.

#### Fire Treatment Spray

### Fire Treatment

We offer a fire treatment spray to our moss - **only** available on request. Certification information available.

# Specification.walls

## Naturemoss

Innerspace Cheshire **Naturemoss** offers 13 different wall designs. All walls are custom built to fit the size of your required space.

Unless specified and agreed at the time of order, Innerspace Cheshire reserves the rights to produce its walls using its own artistic interpretation.

Moss is a natural material so a variance in texture and colour is to be expected.

### Product Options

forestfloor
